CASE STUDY

bigHead

"The task was to find a provider of a bespoke canopy to reduce lighting change effects on our precise measurement mechanic programs. We approached Kanya and within a matter of days they provided us with a detailed bespoke design.

A few minor tweaks and the design was commissioned. Options to receive assembled or in kit form were provided. The finished product fitted beautifully, first time.

From enquiry, through to final design and ultimate delivery, the whole process was efficient, streamlined and good value for money. I would certainly recommend Kanya for your bespoke aluminium modular system needs"

Vinny Bacon,
Quality Manager | bigHead Bonding Fasteners
